

123 JACKS

SPIELERKLÄRUNG

123Jacks - an innovative and attractive side bet on the most popular casino table game - by Casinos Austria

Why should we win:

With this innovative side bet, Casinos Austria managed to both increase revenue and offer a new & fascinating product variety, which is highly appreciated by our guests.

Results

Casino Austria increased revenue per hour on Black Jack tables by over 27% (in comparison with the average revenue of the last five years) after introducing an in-house developed side bet in September 2022. Furthermore, revenue at Black Jack tables was enhanced by approximately € 10,000,- per day over this two-month period.

To be successful with your Table Games products, it is imperative to set new stimuli from time to time to maintain the interest of your patrons.

Winners at a Black Jack table are traditionally paid 1:1.

In our opinion, there are some important criteria that make a side bet successful.

- To be easily understood at first sight
- High hit-frequency
- The chance of winning a substantial amount
- Little reduction of dealt hands per hour

Having these criteria in mind, we developed 123Jacks.

Easy to understand:

- By placing a bet on the 123 Jacks additional game field, the game participant is betting that one, two or three Jacks will be dealt in the initial deal (the first two cards in a player's box and the first card for the bank.). The simplicity of the rules makes 123Jacks interesting for all players from beginners to advanced

High hit-frequency:

- A hit frequency of 21.4% means that every 4.7th bet wins

Chance of winning a substantial amount:

- The combination of three Jacks of Spades will be paid out 300:1

Little reduction of dealt hands per hour

- Controlling the results is neither complicated nor time-consuming for the dealer.

Casino Revenue Results:

Percentages, round figures or actuals

Introduction of side bet 123Jacks: September 23rd
Results after two months

Revenue 2017 (Black Jack) per hour € 270,-
