PRODUCT FEATURES

SEAT

Maya Regular

Product featuring a **highly innovative design**.

Multi-purpose model capable of satisfying the needs of all casino gaming applications.

Modular seat with **integrated lumbar support, with or without armrests**, three different backrest heights.

Padding in flexible injection-molded polyurethane with medium softness with an additional **Comfort Plus®** layer.

Seat with ergonomic surface that allows easy and frequent changes of position necessary to optimize comfort during extended play time.

Backrest available in three heights: low (Small), medium (Regular) and high (Tall), to meet all gaming applications requirements: tables, slots, etc..

The version with high backrest (Tall) is designed for technological accessories such as speakers, rear monitor, armrests with push buttons, etc..

Backrest support plate in chrome plated steel (Threechromium - ecological and antibacterial chrome).

Customizable finishes.

Completely **removable cover**.

Customizable coatings colors and materials with optional antibacterial properties.

FRAME

Tower Pin

Design model with **innovative construction features**.

Powder coated frame, circular footrest in chrome plated steel (Threechromium - ecological and antibacterial chromium). **5-spoke base with swivel wheels or fixed glides** for hard floors or carpet.

Available in various heights. Customizable coatings.

In combination with the Maya seat collection, with or without armrests, backrest available in different heights, it is perfect for all gaming applications inside the Casino.

With **patented rotation mechanism RH360R** to be added.

PATENTED ROTATION MECHANISM: RH360R

Available height adjustments :

48>64 cm – 18,9”> 25,2”
55>71 cm – 21,65”> 27,95”
65>81 cm – 25,59”> 31,89”

Patented model

Description:

360° rotation:

- with auto-return to center
- with clutch mechanism
- with height adjustment to be chosen among:

h=18.90/25 in., h=21.65/27.95 in. and 25.59/31.88 in. (6.29 in. range) – all heights with footrest.

To optimize the seat height to the playing panel, StylGame® conceived and manufactured a new seat rotation mechanism, designed by our technical team and protected by two international patents.

This one-piece mechanism incorporates **3 main functions**:

- 1) the **“clutch”** on the swivel system acts as a break on the micro side rotations of the chair caused by the player’s arm movement during the playing session. This swivel would be instinctively contrasted by the player engaging the lumbar region and causing lower back pain;
- 2) the **360° seat rotation** with automatic return to centre comes into operation only when the player stands up. While playing, the player doesn’t need to contrast the return to centre push that all other mechanisms have. Therefore, he can play in a relaxed position without engaging the parts of the body that would try to oppose to such force;
- 3) the **height adjustment** is important to optimize the player correct posture to the playing panel on different machine brands, using the same seat and applying the Play in Comfort® Basic System.

COMFORT PLUS®

Thanks to the continuous R&D developments, StylGame® can now offer a new, revolutionary material, **Comfort Plus®** as an option for its seat padding.

Its main features are:

- **HIGH VENTILATION**
- **MICRO MASSAGE**
- **HIGH COMFORT**
- **HIGH DEFORMATION ENDURANCE**

Comfort Plus® provides **HIGH VENTILATION**, allowing a constant temperature maintenance for the body contact areas of the seat, with a reduction of 2-3 degrees compared to the surrounding environment, thus avoiding sweating. The ideal combination to this material is a breathable upholstery material that enables airflow.

Comfort Plus® activates a constant natural **MICRO MASSAGE**, stimulating microcirculation and offering players a much greater comfort, allowing them to stay at the playing station much longer without feeling any circulatory disorders.

Comfort Plus®, thanks to its specific structural fibers, offers **HIGH COMFORT**. The image of biometric tests made with Comfort Plus® shows how all discomfort areas disappear compared to the medium density inject foam.

DEFORMATION AND COMFORT TEST

Usage	Article	Density	Compression, determination of stiffness in Newton			Residue deformation 22 hours at 70°C		*Comfort* 65%/25%	DEFORMATION & COMFORT
