

myACP

CASINO MANAGEMENT SYSTEM

ONE SYSTEM - UNLIMITED POSSIBILITIES

myACP is a modular casino management system, launched in 2001, that can be easily adapted to meet the requirements of casino operators. The flexible system is highly suitable for small arcades as well as large casino operations. Thanks to its innovative and user-friendly design, almost 1,200 gaming locations in more than 25 countries already trust this powerful tool. It runs on a highly protected Internet connection based on secure firewall and encryption, uses a highly secure data transfer protocol, provides a full information back-up of the database and offers the possibility of automated storage.

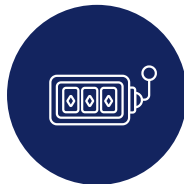

TECHNICAL INFRASTRUCTURE

- Flexible system structure to satisfy both single- and multiple-site operations
- The system is hardware provider independent
- High availability solution
- Remote management
